Is China changing game?

Yes, big investment in worldwide infrastructure and strong technological leadership

This involves  
new political  
equilibria in the  
global context

Challenging  
European Union  
future and its  
role in this global  
context

Climate change  
and environment  
research and  
innovation

Quality of life

Equity and  
equality

Sustainability: not  
only environment  
Innovation, but  
also societal  
innovation

# A Strategy for Europe In a Global dimension

A worldwide leadership

Industry & service  
innovation

climate change  
environment  
research

# Technoscience and economic development

---

- A clear vision from environmental to social sustainability
  - A relevant investment in research but also in industrial applications
  - Competences for integrated development of science and industry
  - Avoid fragmentation of perspectives and dispersion of forces
  - From short-termism to long-term perspective
  - Not «green industry» but «greening the industry»
-

# LISBON Strategy 2000

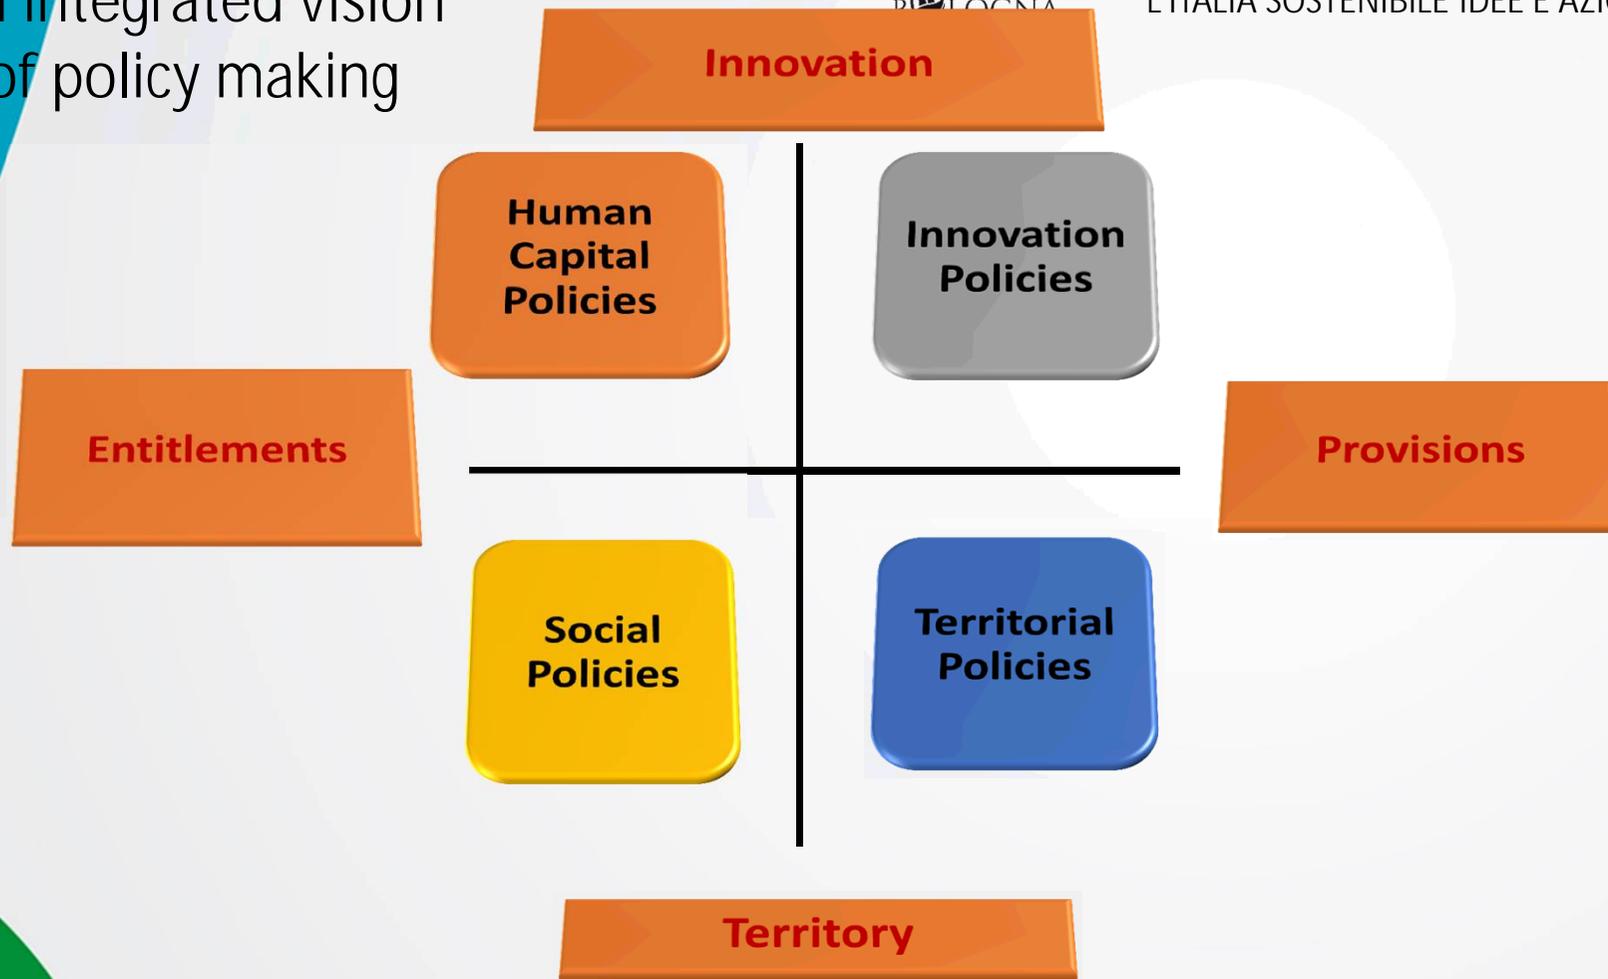

---

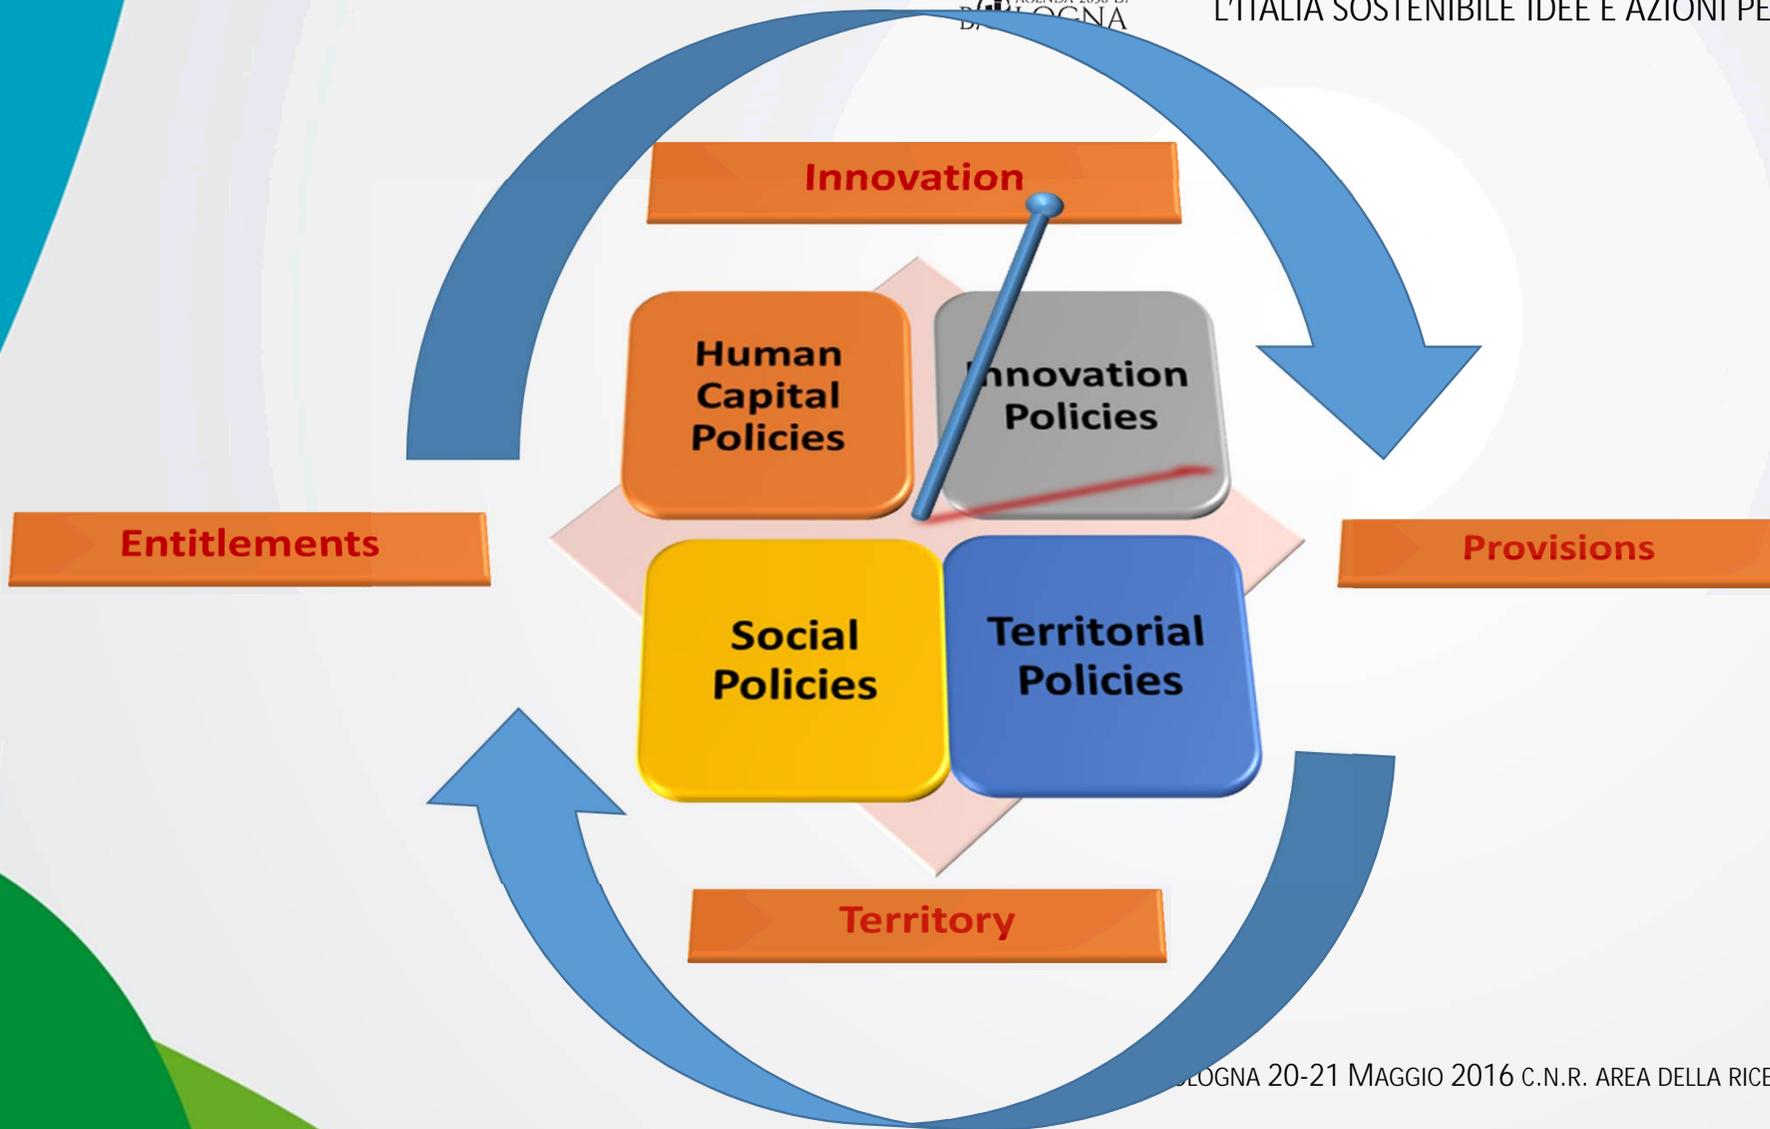

- Not «green industry» but «greening the industry»

- Research
- Education
- Vocational training
- Sustainability

- The quality of a territory as a factor of attraction investment, competences, brains

# An integrated vision of policy making

Re-establish a long term perspective for an  
active role of Europe 

---

In the definition and implementation of global  
strategies focused 

---

On development, on welfare and equality, and  
so on peace 

---

Thanks
